

SICO MOBILE FOLDING CHORAL RISERS

FEATURES

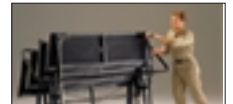

Unit to Unit Cam Connector draws units together and locks them into place. There are no gaps between units for heels to slip through.

Carpet completely wraps tops and sides of all decks so they are always quiet. Carpet also eliminates the possibility of catching robes on sharp edges.

A permanently attached **security rail** brings peace of mind since it can't be left off accidentally or because it's too much trouble to put on. One inch, deck to deck overhang reduces accidents caused by heels slipping between riser tiers.

Reinforced **neoprene feet** provide scratch-free floor contact. When folded, units roll easily into position or storage.

Exclusive **deck locks** allow quick configuration changes. This system allows instantaneous change of the deck arrangement so units can be converted from a curved to either a straight line configuration, or a combination of curved and straight line.

ADDITIONAL FEATURES

- Four wheel design means no liting to transport.
- Three and Four rise models fold for convenient storage.
- Exclusive deck locks allow quick configuration change.
- Shipped fully assembled.
- Black powder coated finish offers an non-reflective yet attractive appearance.
- Serial numbers for easy identification.
- Take advantage of the free space analysis drawings which will provide you with the appropriate number of risers for your venue.
